Eyes  
Antenna  
& 6 legs  
(and sometimes wings)

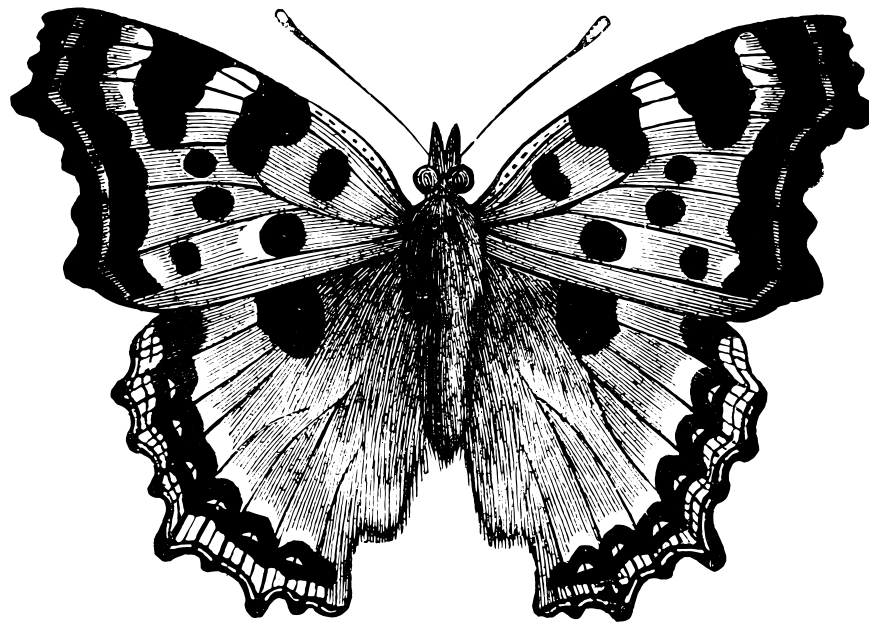

Most beetles eat parts of plants such as leaves, fruit, seeds or wood. Some beetles eat other small animals or even dung.

Color this beetle and draw some yummy plants for this beetle to enjoy!

Most adult butterflies drink nectar from flowers through their tongue, which works a lot like a straw.

Draw some flowers for this butterfly to enjoy!

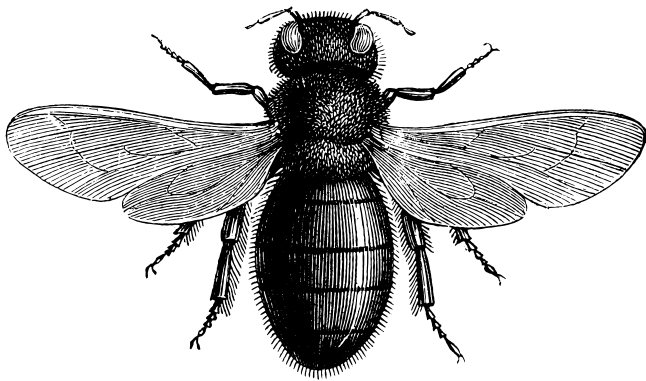

Draw some insects you find in your backyard  
How many insects did you draw?

Tell or draw a story about an insect

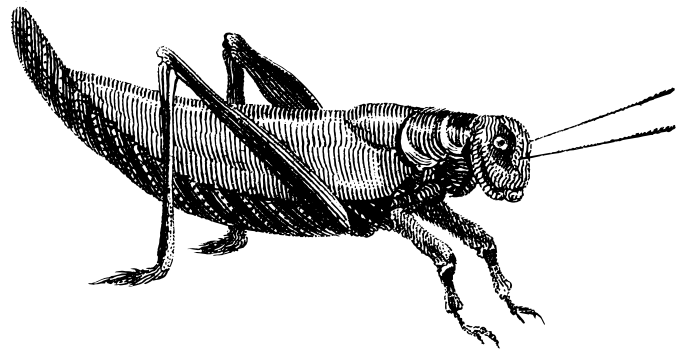

A series of horizontal lines for writing, including solid lines and dashed midlines, providing a template for a story.

# Color these common insects you might find outside

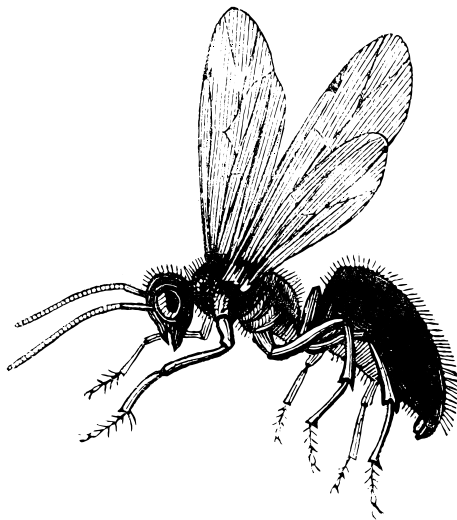

## Bee

Eats: Nectar, pollen  
Home: Beehives

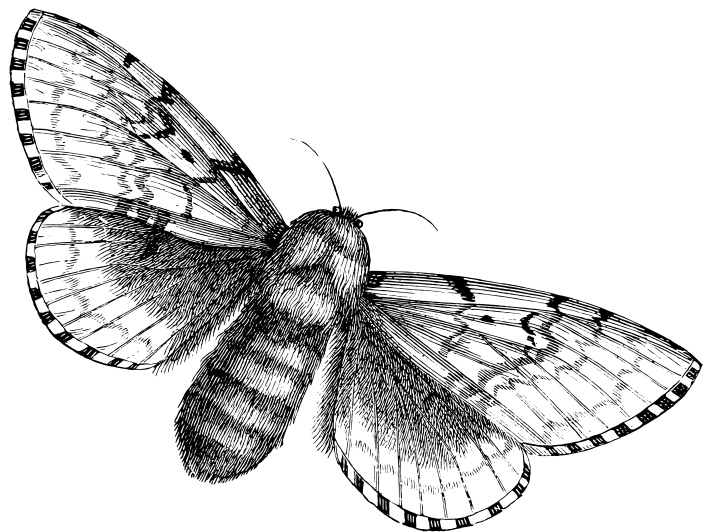

## Grasshopper

Eats: Grasses, grains, leaves, flower, seeds  
Home: Grassy areas

## Ants

Eats: Nectar, liquid from plants  
Home: Ant colony

## Moths

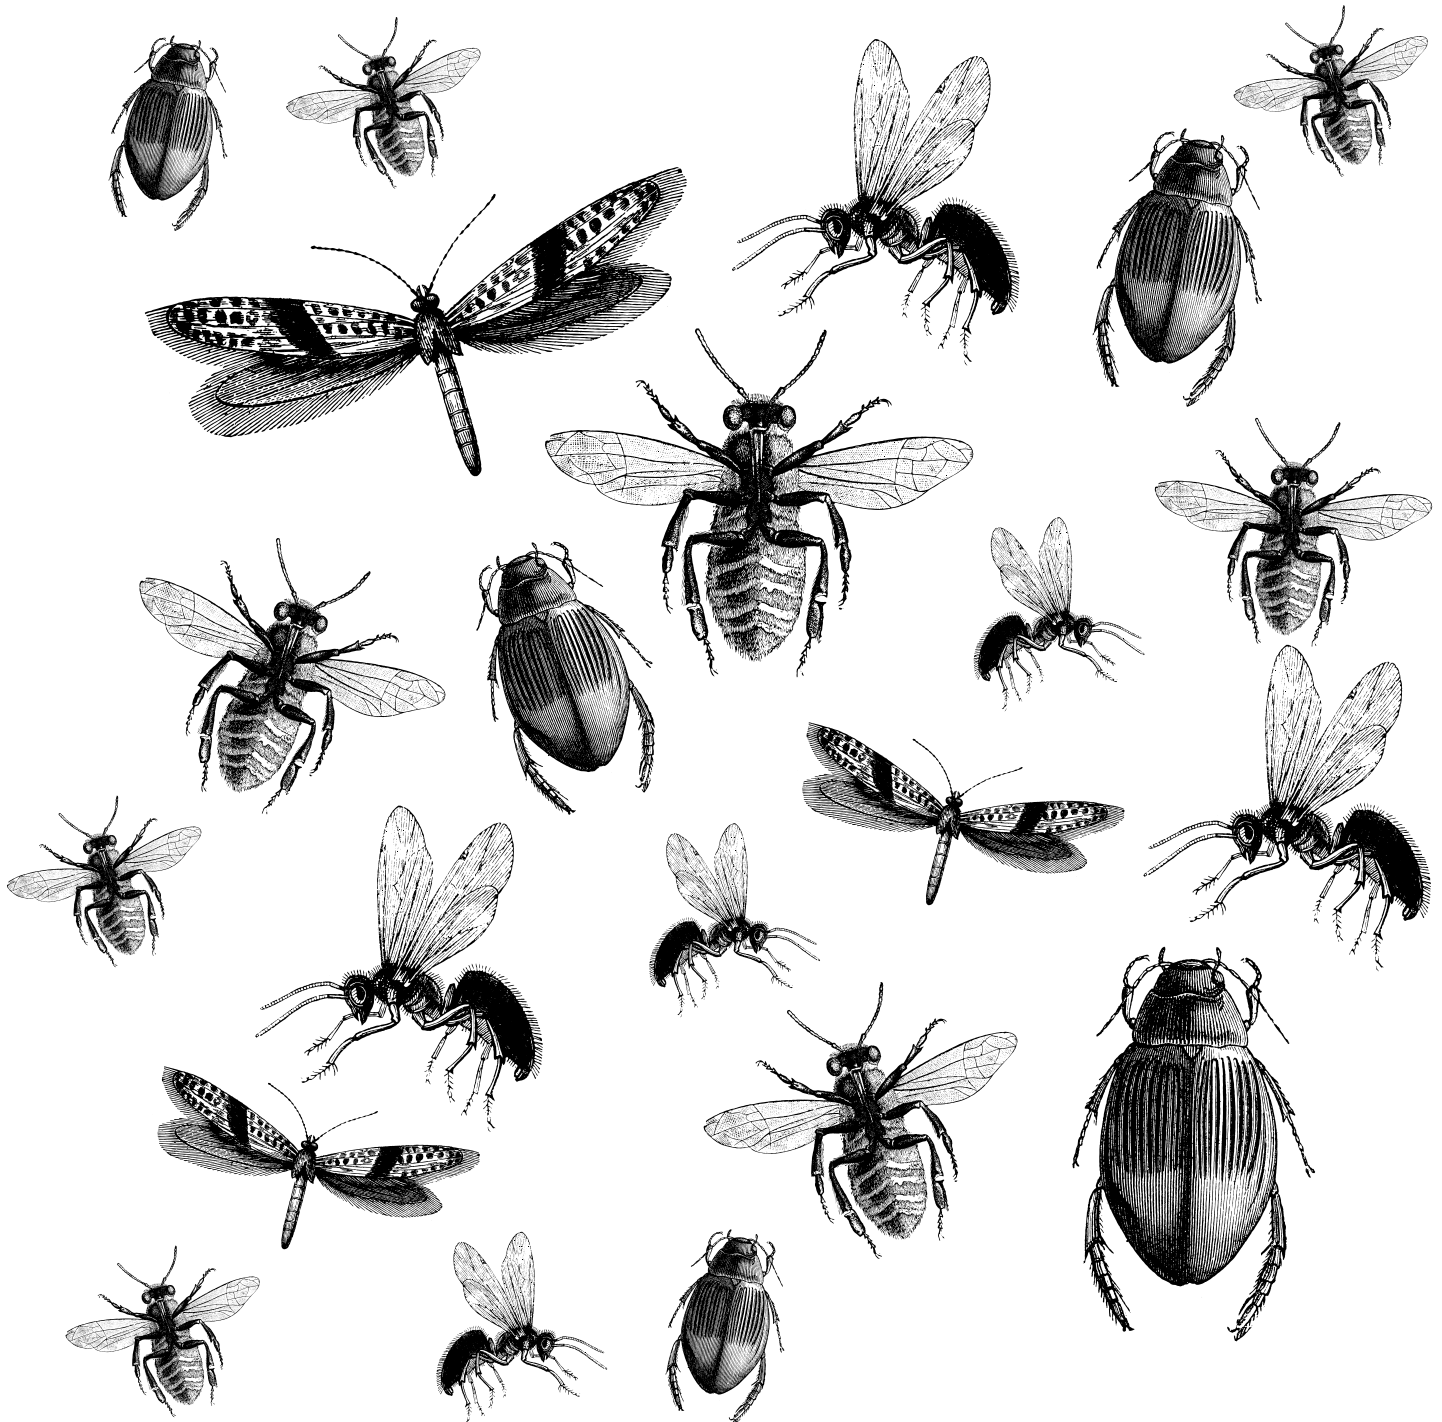

Eats: Nectar, sap, rotting fruit  
Home: A hiding spot to sleep

how many  
dragonflies  
do you see?

how many  
beetles  
do you see?

how many  
bees do  
you see?

how many  
flying ants  
do you see?
