

# TURKEY

## LIFE CYCLE

Label the  
**TURKEY**

Turkeys can see better than humans.

Turkeys snoods are for mating.

Male and female turkeys have the same poo shapes.

Turkeys cannot lay eggs.

Turkeys can run 12 miles per hour.

Toms have more warts than hens.

Turkeys beards grow three to five inches per year.

A female turkey is called a hen.

Turkeys are omnivores.

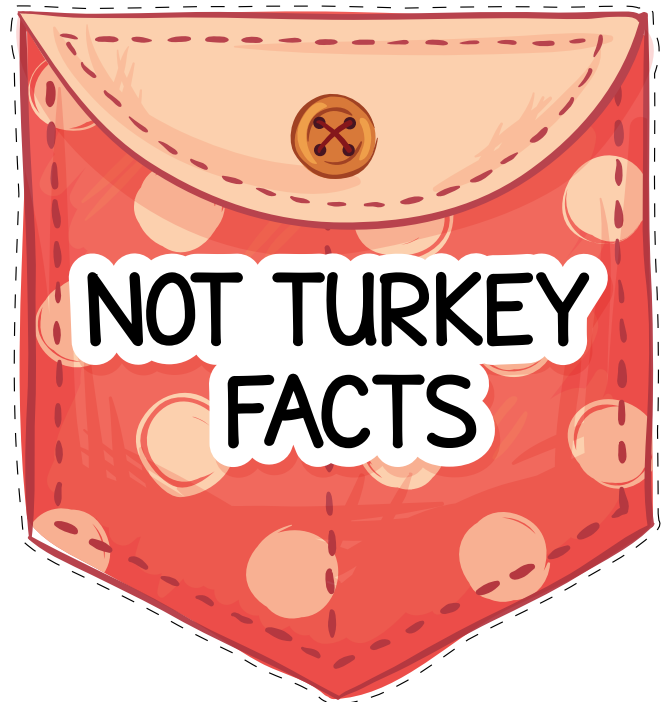

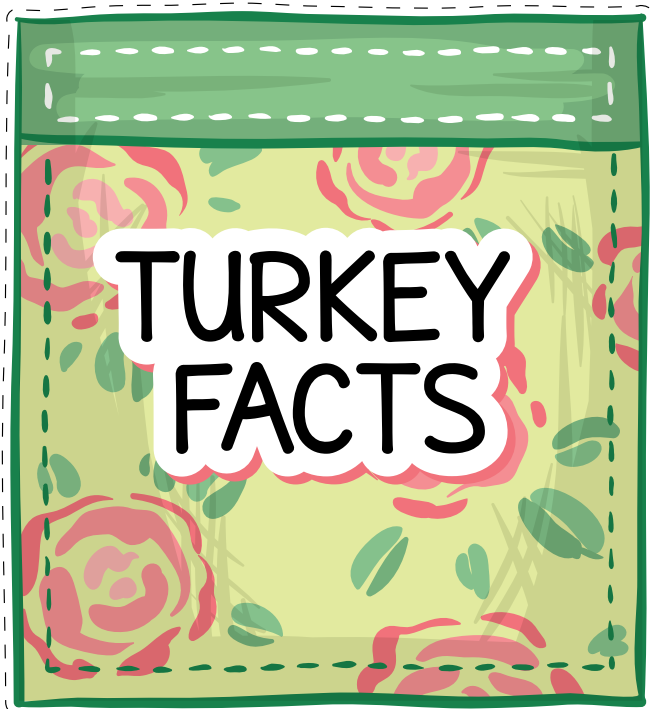

Only male turkeys gobble.

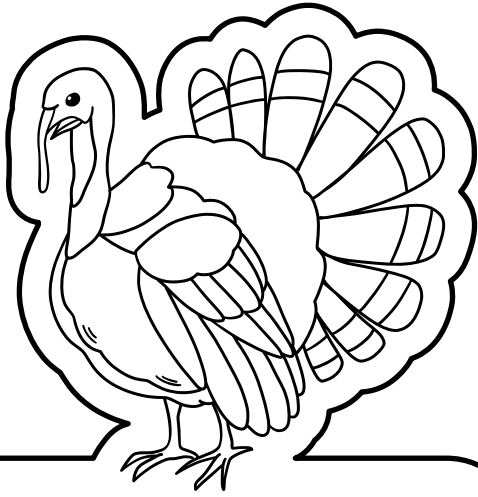

Wild turkeys can fly.

Their poop determines if they're male or female.

An adult turkey has around 5000 to 6000 feathers.

Baby turkeys are called poults.
